Pretty simple question..Whats the best way to tie a tandem nymph rig i no its a common thing to do im just not sure how to go about it.

Thanks

adam

hof52,

As you can see, sometimes a basic question here on the Beginner's Forum can result in some complicated answers and general disagreement among responders. Fly fishing is a complex sport and that's a big part of its appeal. By all means try the different approaches here (tying to either the eye of the hook or the bend) and see which is easiest and best for you.
