Nobody?

The majority of our readers in this community are trout fishermen and few seem to fish for anything else - at least this is my unscientific impression.

Even fewer fish WW lakes.....although I think both of these have changed in the last couple years in the direction of more folks fishing them. Maybe there's some fans of this lake but they don't care to discuss it?

Why not give Meadowgrounds a whirl and write us a report? We could use some more fishing reports on WW lakes in my opinion.
