What's this pipeline?

Here is a link to an article on the pipeline: <http://mainlinemedianews.com/articles ... 0e4c44e9b139953190241.txt>

Here is an excerpt from the article:

...More specifically, the proposal being discussed in Warwick was a 30-inch natural gas transmission line from Lycoming County through Berks and into the vicinity of Eagle in Chester County.

In Chester County, township officials have said the proposed route would take the Commonwealth Pipeline through French Creek State Park, The Hopewell Big Woods, Ryerss Farm for Aged Equines and across at least four "exceptional value streams," including two branches of French Creek....A collection of pipelines and two compressor stations, the natural gas equivalent of a pump station, are located in West Vincent and Upper Uwchlan....

Ha Ha...yall thought MS just effected the hayseeds and hilljacks up north!! 😊

BTW, I live right a few hundred yards from Eagle and in Upper Uwchlan township.

And here's one for the Central PAers: http://www.pennlive.com/midstate/inde ... nwealth_pipeline_wou.html

From the link:

"The 30-inch Commonwealth Pipeline would pass somewhere east of Harrisburg and west of Lancaster.....the 39-mile MARC1 pipeline project through Bradford, Sullivan and Lycoming counties was proposed to run north-south as is expected to cross more than 100 streams, many of them high quality. It would go through 41 wetlands, clear over 300 acres of forest and require the destruction of more than 200,000 mature trees.....it

essentially opens up unbroken forest and into an industrial zone...”
