In June or July I usually visit some family in Vermont and there's good pickerel fishing there, but how early can topwater start around here?

Also for pickerel the ones we are usually catching don't ever pull more than 24 inches, maybe 26, so you don't need huge flies for them right? We usually catch them on poppers about 2 inches maybe a bit bigger. Would we hook up on bigger fish if we used those huge flies? It's pretty shallow water, you couldn't get a boat with a motor back there. Lots of lily pads and reeds and logs and other structure, with some deeper pools
