IMHO, by far the best bang for the buck in fly lines has got to be LLBean's Streamlight. It is basically SA's Mastery Series Headstart just relabelled for Bean and they sell them for \$19.99 and I've seen them on sale regularly for \$14.99.

But only in the store?

I wonder if buying an expensive line is cheaper in the long run.

I have lines over 12 yrs old. Orvis at about \$49. They are like new but of course I have not used them much and I'm strict about maintaining them.
