Nets - your opinion?

Hi

Thinking about getting a landing net - particularly the "ghost bag" type. Have limited experience with nets - generally thought they were an extra nuisance but want to handle fish less and keep them in the water more. With a larger fly it's easy to grab the barbless fly and remove it without taking the fish out of water. However lately with little flies (18 - 20) its hard to just grab the fly and generally I have to hold the fish while removing these small flies.

Before dropping \$80 on a net wanted to get a feel of the general opinion of the pros and cons of carrying a net for normal trout fishing.

Thanks a lot
