I purchased a Grey's Streamflex 11' 3 wt last spring. Every trout reel I own did not balance the rod to my liking. I tried lead tape that i use to use in balancing golf clubs, but could not add enough weight? I read a tip on this site about adding lead core line under the backing. It was a cheap fix. If you try this, please spend an extra buck or two and buy a lead core line that will not bleed its color onto backing and line. I used Cabela' Sufix 12 pound.
