You can get [this](#) net at Wally World for \$20. It's the net I currently use and it works well. I had a deeper Frabil, but streamlined all my equipment and this doesn't stick out as far (which equals less snags while navigating the stream banks). Nets are nice and great way to reduce handling the fish. As mentioned, don't forget a magnetic net release or some other means of securing your net so that it doesn't go amongst the missing!
