Hello everyone, my name is Derek and I am new to this forum. I have been fishing with spinners and bait fishing worms behind a bober for a few years now. Ever sine i moved a stones throw from the s. branch codorus creek. I usually catch at least a few.

Now I want to take to plunge and learn to fly fish. I seems very challenging and rewarding way to fish. My first question is what would you recommend for a moderately priced entry level beginner fly fishing set up and where would you recommend going for one? what is the bare minimum that I would need to get started. Rod, reel, backing, floating line, leader, tippet and flies? whats the easiest method to get started with, Dry, Wet, streamers? I'm slightly confused as to the differences and needed equipment. Any information or tips would be very helpful to someone looking to get started in fly fishing. Also if anyone is from the York area and could give any suggestions as to good places to fish other than my home stream south branch codorus.
