Scatter,

Not sure about a nail knot tool for tying blood knots but others may want to comment. I have 2 tools to tie blood knots (you can find several types in fly shops and on-line sites) and keep them at home. I will use these tools to tie sighter leaders and add tippet to existing leaders. When fishing, I use a triple surgeons knot to add tippet. For me, I'm not concerned about mastering hand tying a blood knot.
