My brown was about 20 inches exactly according to my measure-net. I saw him charging for my streamer from out of the depths. What a sight! My brown was not as fat as I would have expected, but that may have to do with the time of year more than anything else.

I think David's brown was in the 16-17 inch class.

If you're going to have a one fish day, these are the fish you want to have it with. Thanks to David and DaveS for a lovely day on the water.
