I was just on the Pa fish and Boat web site for the mentor program and seem to be confused. They specify the mentor as father and son, grandfather etc. Also that it is not for persons giving instruction. It even explains what the mentor system is. So if they do not want others to help why are we asking for it. Do not get me wrong. I am all for helping youth but it appears after reading there rational this program is a test program for a more family oriented situation. Also I see to many adults fishing at the childrens area of Boilingspring lake as it is. I believe this could make matters worse. It should not be about how many fish you catch but the time spent with dad and so on.
