AFter a 2 weeks of being miserable and probably causing permanent nerve damage to my foot, I decided to dig up the receipt and take my waders to the store. Dicks will not accept them because it is over 90 days, even though I bought a 1 year warranty from them!! I am in disbelief, and was told to contact field and stream, so then I did, and low and behold, no proof of purchase of the warranty and was told to return them to the store, so I went back to the store spoke some words with the manager and a no go.
