id say buy. ive thought of doing the buikd but the materials are a lot of money. you need marine grade plywood which can be hard to find. there are a lot of good kayaks out they too. I think that a much better choice the a canoe. one boat that I think looks cool but I don't know if it suits your needs but a gheenoe. sweet little boat like a canoe but you can put a motor on it. more for lakes and flat water. id say go with a good kayak. there are so many out. and a lot are designed for standing.
