Very nice ties - as usual.

Question: When you're wade fishing, how do you carry muskie flies?

I have the same large box for muskie flies and it's fine in my boat, but it's too big to carry while wading. I'm still trying to figure out a good system for transporting large flies in my vest. I do have a small compartment box with long compartments that I can (barely) get into one of my vest pockets. Sometimes, if my pockets are full of bass boxes, I'll roll a couple muskie flies into a cloth and they fit under the bass box in my pocket. Still trying to figure out a good system. Maybe I need a chest pack?
