What are your favorite streams or bodies of water to fish? I enjoy traveling and look for something different. I understand you may not want to mention the name of the Brookie stream but perhaps a general location and your good times on it. Yes even warm water.

Example:

Rappahanock river in Va. near Falmouth for Hickory shad. It has a section that reminds me of freestone trout fishing with small pools and fast running water. If you like fishing a stream like the Yough. in SW pa. you may like this. Also it gives me a chance to fish those pretty colored flies.
