I have the 9' 5wt.....is a mod fast action or seems to be to me....will load to the middle of the rod.....not all that great in close with a 5 wt line in my opinion....I had a DT 6 on it and it worked well at 20-30 feet but got soft past that.....would probably be best with a half size heavier line like a SA GPX but it depends on personnel use/opinion

Overall, I am happy with the quality of the rod for \$200 and would have been much happier at \$129 especially if it is backed by warranty....I have two Orvis Clearwaters as well and it is on par with them for original price point and quality

Really is a steal for \$129
