that is a cow !

Guaranteed it is (or WAS) a cow. I'm happy for the dude, but, I have a hard spot with killing such a big breeder. She was certainly the queen bee of her domain. Legal to kill her? Sure it was....in season and all that. And one less breeder will, I guess, have zero impact on the population. I personally could not have brought myself to do it. Not meaning to get on my high horse or anything; like I said, he was well within his rights....just my 2 cents.
