I was there a while back when the WCO was putting up the current signage. He offered the following...

The limits of the TT Section did not change, but the signage was wrong and misplaced for years. FF's actually took signs from the lower portion of the reg section and posted them farther up the stream.

The upstream limit of the special reg section ends where Hellertown begins to own property on the eastern streambank. Looking at tax maps this designation is closer to Bachman Street than Goodman Dr. If you look at the PFBC map the upstream limit also ends closer to Bachman St.

I think I remember an "End of Special Reg Area" sign being put up just above Bachman Dr. which is the street along side the blue recycling building up on the hill. And I know an "Approved Trout Water" sign was placed above that.
