Looking at where you have already fished I hope you will not be disappointed in our local fishing. Not that it is not good but we have a fair amount of fishing pressure. Not only do you have to outsmart the fish but you usually need to be a better fisherman than the last guy fishing. Perhaps you need to have a tour of the area streams with some fishing mixed in. If you have read about our area there is a lot of fishing history from here. You may be pleased to see and experience some of the history of how flyfishing evolved in the US. Hope you can make it here and enjoy your trip.
