I have an inflatable raft with a jointed flexible plywood floor , the manufacturer name is SEA EAGLE most of the outdoor catalogs have them. Cabelas carries the exact same one. It's small but not too small , supposed to be a six man but it will take 3 comfortable but two is perfect. I am an amputee , lost my left leg below the knee in a steel mill accident , before the accident one of the strong points of the raft was being able to stand and cast if you had to , well after a few years practice i can once again stand in the raft and cast , it is very stable. the plywood floor adds some weight but it's distributed. It takes about 3 inches of water to be able not to rub , if you armorall the bottom it slips right over pretty much everything. I LOVE my inflatable raft and if i had to go buy another it would be the exact same. GOOD LUCK CAP'N
