Casting to the other Side

There is an old Bible verse where Jesus tells the boaters to drop the net on the other side. After they did this their net was so full of fish that they almost sank the boat. Fact or fiction? Are you in doubt that this happened. Maybe I can change your mind.

If this only happened once I would not write about it. For me it has happend at least 4 times at Lake Noximixon. These times I was fishing one side of the lake with no results. I decided to switch sides and sure enough I was catching fish. I don't have any answer as to why this happens. Maybe it's current flows, maybe its the direction of the sun. So if your out on a lake or even a river and the fish are not biting, try casting to the other side, it may turn out to be "Fish on".
