I see both sides of the issue. Those of you from central PA and east, are blessed with numerous wild trout waters and better water quality than what we have in the west. If we had numerous wild trout waters here in the west that were getting stocked over, I would probably be upset too.

While I am all for the wild trout movement, here in Western PA we just don't have the aquifers necessary to produce wild trout. Without the stockies, we just don't have trout fishing here - with a few exceptions. And agree or disagree with it, stocked trout fishing will continue to be the only program that many people will buy a license for.
