Why don't you just use a braided loop? I super glue them on and they last a very long time. I color them with a red marker and use them as an indicator on super smooth water.

'Cause they suck?

Whip a loop on the end of the line or nail knot on a heavy piece of mono and tie a loop in it. If you don't have a spool of heavy mono you can use a piece cut from the butt of an otherwise junk leader.
