To everyone saying throw out the stocking program, let me ask this: without the stocked trout program would you even fish today? or did you guys just pop out of the woom and slay wild fish and wild fish only. Without the stocked trout program I feel like overall the fishing in PA would go down. The fact is that some of the wild fish have come from hatchery raised fish naturally reproducing. I know of 3 streams that are on the stocking report that havent been stocked in 3 years and frankly I dont care but for the past 3 years I've seen 40-50 people easily make 1 hour plus drives and park campers stream side only to come home the next morning and not catch one damn fish. If I hadnt fished for stockies I prob wouldnt have picked up a fly rod, and had the desire to get educated. Just my .02

First of all I almost never keep fish, but when I do it's only ever stocked fish. And no I didn't pop out of a WOMB and start fishing for wild fish. That just the only fish I have any interest in catching. Oh, I go to Pine Creek once in a while, but never to keep fish.
