Buying Flies

I am new to fly-fishing in general. I have quite a few questions, but the one I am asking is, can I cast a size 2 fly with a 6 weight fly, and what is the smallest fly a 6 weight rod would cast. I ask because I don't want to buy flies that are too big and waste money, but I plan on tying flies eventually:) Like I said I'm new so I don't have too much common sense when it comes to fly fishing. Any information will be greatly appreciated.
