Mountain Brookie - Am I correct that you whip finished two-tone heads on a couple of them? Looks like You put some colored thread wraps over the black before you laquered them.

Yes I did, it's the way that style of fly was originally tied though my bands are far from perfect. Guess I'm trying to incorporate a little history.

As far at the streamer/wet fly debate here I'm fairly certain that they're streamers. I've never seen a wet fly tied on an 8XL Martinek Streamer Hook, but I could be wrong.
