Interesting.

I've had a few people tell me that the areas of Pine Creek for which this is proposed is up for being reclassified as class A wild trout water. Regardless of how hard I tried to explain to them that Pine could never be class A they wouldn't budge. Apparently these folks have been terribly misinformed...

Yeah, it would never go class A unless they selectively surveyed only the mouths of the coldest tribs.

What this WOULD do is change the stocking from pre-season AND in-season to in-season only. So "Opening day" would change to the inseason stocking day. On the other hand, any local co-ops COULD stock it pre-season but the harvest limits would remain the same as the statewide general regulations
