I use an old Pentax Optio WP. Not that I'm interested in underwater photography, just that I don't want to have to replace the camera when I take an unexpected dip. I do wish it had a real viewfinder. The LCD display is hard to see in bright sunlight. I will give the camera 5 stars for being waterproof. I forgot it was in the pocket of a pair of cargo pants once and sent it through the washing machine. I remembered just as the washer finished the final spin cycle. Camera came out clean and fully functional. Not sure how it would've fared had I sent it through the dryer...
