I have really fond memories of fishing this stream as a kid and teenager. Must say it has probably been 20 years since I fished it. Friends of my parents owned a cabin on it.

Just curious if any board members fish it. Don't need any reports or secret spots. More or less just checking to see if it as good as I remember it. I am sure my memories come more from nostalgia than anything else.

I should make the journey up and fish it but much like that old girlfriend the memories are likely better than the current reality.
