Robbie, have you bought a rod yet? I agree with the above posters. You have mentioned Hay a couple times. A 9' 6wt would be a bit much for that stream but if thats what you have it will work. If you are in Berks and want to go to TCO to pick up some samples for ordering from pn8's source (which is a good source and good guy) let me know. I have a bunch of stuff you can take a look at as well (part of a large lot I bought with lots of duplicate flies I'll never use).
