I often times fish deer creek in allegheny county. Up until about a week ago I was catching fish on a regular basis. I have had success with both san juan worms and flashback pheasant tails.

However I stopped to do some fishing yesterday and much to my disappointment I didn't even see a fish. I can only figure a few reasons.

1. They didn't stock very much.
2. People are illegally taking them.
3. People are not being cautious in their releasing.

Does anyone fishing this area notice the same things?
