If streams are low now, they have to be better than last year. Last year at this time there was much concern about the lack of rain and low stream levels, at least in SEPA. The forum had at least 3 threads on the subject. One member, wildtrout2 wrote: *"I can't recall anything like this in my lifetime. This looks REAL bad!"*

Here's a six page thread from last year on the subject:

[we need rain darn it](#)
