70 denier flourescent orange thread,  
start off just like a normal hares ear until you reach thorax, tie in flashabou, then use 4 peacock herls for thorax,  
leave space behind the bead to tie in the wing case (flashabou) then tie the hungarian partridge and i do two  
turns, then tie off on top and build a thread collar, its simple just a little time consuming with all the tricks built in.
