For those who think that section of Pine gets a lot of fish you may want to read the Pine Creek Management Plan on PFBC's website. Over the years there have been complaints regarding folks fishing at the mouths of the cold water tribs when trout congregate due to high water temps in the main stream. Folks allegedly kill numbers in excess of the legal daily limit and, in short order, most of these trout are gone.

The way PFBC has chosen to address this issue is to reduce the number of trout stocked in season. Reasoning is that fewer trout stocked means fewer trout remaining to seek refuge from the high water temps of the main stream.

As for stocking beyond what PFBC does, the only area of which I'm aware, at least from Cedar Run downstream, is the delayed harvest section at Slate Run. The hotel and Slate Run Tackle stocks a good number of larger trout in this section of stream.
