I've been looking real hard at this app and couldn't help but wonder can this really be as good as it looked on the site? I called and talked to Mike creator of this fine app. That sealed the deal for me, I've been playing with it for an hour or two (navigating and becoming familiar with it is a snap) and have come to the conclusion that it's better than that good. I'd love to tell you all about it but there's just too much to write. It will do all it says and more, if you live in Pa, like to fish, and have a device you can put this on I highly recommend it. For what you're getting with this app, it's well worth the small price to get it. I've got over 200 albums on my phone, why not have 5000 streams on it too? 🏆 Thank you Mike, and good talking to you.
