Ernie,

There were many reasons for the day, but one of the original reasons when I first proposed it was to have a day to teach and prepare kids for fishing during the opening day a week later. With the lessons learned on their day I believed that they would have a better opening day and be able to fish more independently and more successfully. This would then, perhaps, open the door for parents to take them fishing more frequently or for the kids to go fishing more on their own.

Mike

Nice Mike. Great idea to do something to introduce kids to fishing. Hopefully the program "catches on" and expands in future years. Anyone that complains the kids are catching "my" fish before the opener is a curmudgeon, and that guy should be hung by his rod.
