I too would like to see the fish spread out a bit. Do some research. Some streams are stocked early (the ATW up the road from me was stocked on 3/1). Even the dumb, feeble stockies are smart enough and strong enough to spread out in a month's time....they'll float stock themselves.

But, if you want to fish at the bridge hole in a lawn chair, choose a stream that was stocked this past week (but get there early).
