Volksnurse's recommendation about Zebra midges is good advice. Tie one with about 1 1/2-2 ft of tippet behind a caddis or other good floating fly (I tie the tippet to the bend of the hook of the floater). Zebra's work in sizes 16-22. You can use the same diameter tippet as you have for the floater, but I always go down on size. If using 4x tippet, I'll use 5x for the dropper tippet.

good fishing
