Here is an alternative camera that reportedly stacks up very well against the GoPro.

[ContourROAM 1080p Camcorder](#)

I meant to post it yesterday when it was \$99. As with most things on Amazon, the pricing is dynamic and changes with sales volume. So you may be able to get it cheaper when sales fall off for this item. It is currently selling well because someone posted it on Fatwallet.com when it was \$99 and it surged sales which surges price.

The reviews for the camera are quite good, with some folks owning both GoPro and this unit for direct comparison. Accessories appear to be a lot less for Contour.
