Mike why do the paying anglers need to build the float stocking boxes? What are our licenses paying for. Frankly I refuse to help stock because if the fish commission can't get their crap together enough to stock what am I paying for. Complete and utter disorganization. So essentially you won't float it because that would actually require you to do something. Wow

Wow is right!

You have no idea what you are missing SNP. We have an army of guys spreading fish out along our watershed using trains,(yes trains), tractors, float boxes, and trailers. If you want a better experience with remote fishing for stocked trout you should consider getting involved or begin a stocking program. Sometimes all the locals need is some organization.

Don't blame the F&BC, you get your moneys worth the rest is up to you to contribute through volunteer support or cash support of a volunteer org in the area.

Otherwise you may consider trading your license dollar for a gift card at Giant and just buy the fish. I mean really, whats it all about anyway?
