Sand - I am just telling you what I was told - I don't know the regulations. When you have drivers that have a 3 hour drive just to get to the stream, then a couple hours of stocking, then a 3 hour drive home, you have time problems. Especially when you have stocking 6 days a week for 3 months.

Marvin - The problem we have around here is that there aren't a lot of good float stocking opportunities on our streams. We have too many fragmented stretches on our waters - the WCO is all for it, just no place to do it. I'll let you know if I hear anything though.
