Just an update.

I fished two flies with the dropper fly tied off of the tag end of my tippet. The two flies were about 12" apart if you let the dropper hand down or I could say I had a 15" tippet with a 3" tag end.

The results were 12 fish, no foul hooks. All were caught on the dropper.

No a scientific sample, for sure, but I thought it was enough to make want to stick with the tage end attachment.
