Fished the Upper Letort on Saturday. Not too many people on the stream considering it was opening day. Caught a couple nice browns out of the spawning beds. They were great for breakfast.

Just kidding. Weather was low-50s, with sun and clouds on Friday, a bit warmer on Saturday with full sun on Saturday, rainy and cold on Sunday. Best day was Friday - caught all browns on sulphur-ish patterns. Saturday was tougher fishing with the high sky (probably should have nymphed more). Sunday saw some midge and BWO activity in the rain. Not a bad way to spend the weekend!
