Hodgman PVC bootfoot wader

I've been using my cheapy rubber hip boots for about 2 years now, and I think I'm ready to retire them - the seams are starting to leak, and there are additional holes in several places. I'm still in school, so I can't really afford to spend \$200 on new breathable waders and wading boots, so I was thinking about getting these \$60 [hodgman PVC waders](#) from Amazon.

Does anybody have any experience with the Hodgman PVC waders? Will I regret this purchase? Any suggestions for alternatives?

I've been spending a little too much on fishing gear in the past few weeks, so I really shouldn't be buying anything at all, but I really do need waders for the spring...
