accuweather white haven pa forecast for next Mon is 59, following a 36 degree night. Those conditions could lead to 50 water late pm, I think.

I don't. I guess it could, depending on streams. But the water temps lag air temp by quite a bit in the spring. It's often at least mid-April before you hit 50 in the pm. And we're behind this year.

Heck, at the jam last year, late May, highs around 80 and lows in the 50's. Morning water temps were in the 40's, afternoon temps mid 50's.

It may come out of the springs at 50 something, and the air temperature may be warmer. But the ground is still very cold.
