Marvin,

This is my second season using furled leaders. I'm catching more fish than ever and usually on nymphs. Not sure I'm a better fisherman, but I do know my fly is on or in the water a hell of lot longer than ever before. With nymphs, it is very important to get them deep and fast. That's why God created spilt shot and weighted nymphs.

I love these leaders and, like some others here, will not go back to anything else.
