mike\_richardson, I like the vinyl rib as well. I agree it is translucent. I also like it on larger fly's. But I think your question was is it better or has anyone had more success with it. That being said I use both wire and vinyl rib. I can't really say which is better. But one thing I learned a long time ago use what you like and most likely it will work. But if someone feels one or the other is better I will listen and learn.
