Sorry been furling and working a 0.20 lead wire inside a braided leader....sheesh...what a nitemare.

Tail section is a mustad 37160 sz. 10 with orange goose biots. rib is yellow #76 swannundaze with a yellow rabbit dubbing. colored on top with a red/brown prsmacolor marker. Tied to the front hook mustad # 3366 sz. 6 with a loop of garcia royal bonnel brown mono ( got a couple rolls left and its stiff for doing loops) wing case is dyed brown raffia with a BMFS ( big meadows fly shop) hen feather. custom bred for this. Yellow rabbit under, antennae orange goose biots. I like using orange and yellow together, if you look at some of the stoneflies here in Pa. they have some orange mixed with the yellow and brown colors on the bodies.
