i wonder what would happen if you made it no stocking, and C&R only ALO...apart from kids ponds...

would we see more angler initiatives to improve more waters or the angler numbers drop off a cliff ?

i do wonder about how after rearing, hatchery operating costs, man hours, transport and distribution, how much is actually left for enhancement and enforcement ?

it would be an interesting experiment i think. and anyone caught in possession with a trout would be put in the stocks streamside and thrashed with a wet lettuce....

and of course banning stocking would put paid to private clubs buying up waters like spring ridge does.

not many downsides imho.
